SKILLS AND LANGUAGE

- **Product Design & UX Strategy** – Translating business goals and technical constraints into user-centered solutions.
- **User Research & Usability Testing** – Interviews, usability testing, insights synthesis and hypothesis validation.
- **Frontend Foundations** – Solid knowledge of HTML, CSS, JavaScript and React.
- **Design Systems & UI Architecture** – Scalable component libraries, atomic design, tokens and documentation.
- **Developer Collaboration & Handoff** – Specs, component logic, states, constraints and technical alignment.
- **Agile Collaboration** – Working with PMs, developers and stakeholders in iterative environments.
- **Languages** – Spanish (Native) | English (B2 – working proficiency)

EXPERIENCE

Greenspec (Netherlands) — UX/UI Designer (Product-focused)

2025 – Present

- Led the UX/UI design of Kanut, a SaaS platform for greenhouse automation integrating IoT sensors, alerts and control systems.
- Designed modular dashboards to translate complex agricultural and sensor data into clear, actionable insights.
- Defined scalable UI architecture and component logic to support future product growth.
- Collaborated closely with product managers and developers, aligning design decisions with technical constraints and business goals.
- Applied accessibility best practices (WCAG) and responsive design principles.
- Actively contributed to product strategy discussions beyond visual execution.

LinkTIC (Colombia) — UX/UI Designer

(11/2021) - (12/2024)

- Designed digital platforms for government and enterprise clients (IDEAM, Acueducto de Bogotá, Findeter, Fiscalía, Positiva).
- Built and documented a design system to improve consistency and scalability across projects.
- Collaborated with multidisciplinary teams in agile environments (Scrum).
- Designed dashboards, complex user flows, landing pages and mobile-first experiences.
- Supported junior designers by delegating tasks and resolving design blockers.

Vorse (USA) — UX/UI Designer (Fintech / Blockchain MVP)

(04/2024)

- Led UX for a blockchain-based electronic invoicing MVP.
- Defined user flows, wireframes, and UI for a new fintech product.
- Worked closely with backend developers to match technical and user requirements.

EDUCATION

Caldas University — Visual Designer

Bachelor's Degree

Coursera (Google), Remote • UX Professional Certificate

(2023)
